Your 1-Page Plan

Vizdale Full-Stack Developer Internship

Keep this to **1 page**. In Word, choose File, Save As, PDF. Then add it to your project as `docs/PLAN.pdf` by **Saturday 7 Nov at 11:59 PM**.

Your Name	Umamageswari.S
Project	BillDrop
Client	Irumbu Mart, a hardware wholesaler in Salem
Who will use it?	Accontant at Irumbu Mart, who types supplier bils into Excel
Your How Might We, in your own words	How might we turn a week of paper supplier bills into clean, checked records in minutes instead of 2 days, and catch errors before money is paid?
Your tool in one sentence	BillDrop is a web tool where an accountant uploads supplier bills, the text is read automatically, and they check and save clean records.

#	5 things a user can do
1	upload a supplier bill (PDF,JPG,orPNG)
2	See the bill's status change as it is read
3	Check the bill beside its fields,and correct anything wrong
4	Save the checked bill
5	See supplier totals and download an Excel file

Your AI feature	Reads the text of an uploaded bill, then fills in the supplier, bill number, date, line amounts, and total. The accountant checks everything before saving.
Main screens	Upload (drop files, live cards, Save All Clean Bills, Download Excel), Review (bill beside its fields), Supplier Totals, Problems (manager only, read-only)
Made-up data you will use	10 made-up suppliers, 1 accountant, 1 duplicate check, and 20 made-up one-page bills (PDF or images), including one with a total off by Rs. 1,800 and one repeated bill
What worries you most?	Reading messy bills correctly with OCR, and making sure the AI returns the right format every time
